

DRINKS & SNACKS VENDING MACHINE

Combo Lift

High-capacity snacks & drinks machine with a gentle lift for glass and fragile items

The Levendo Drinks & Snacks Combo is a smart vending machine ideal for modern locations such as offices, hotels, or gyms. With space for up to 600 products across six flexibly configurable levels, it sells a wide variety of snacks and drinks — including sensitive and fragile items.

A 22-inch touchscreen shared between both cabinets keeps operation simple, while cooling between 4 and 25 °C guarantees the right storage temperature for every product. The lift gently lowers glass bottles and other fragile items instead of dropping them.
